## About Us

The 14-30 has a rating of 30 A, and an L-shaped neutral blade.

## What do NEMA Ratings Mean

Within the infected insect, the beneficial nematodes continually reproduce and then spread out for long-term control.

## Nemak

These are deprecated due to the lack of grounding but L10-20 and L10-30 devices are specified by NEMA and are commercially available. NEMA wall receptacles can be found installed in any orientation. As commonly used, 10-30 and 10-50 plugs required the frame of the appliance to be indirectly grounded via a strap connecting to the neutral blade.

## NEMA enclosure types

These receptacles are typically found in older residential buildings and are not allowed to be installed under current NEC codes.

## Nemak

Ungrounded NEMA 1 plugs are still popularly used by manufacturers of small appliances and electronic devices because of the design's low cost and compact size, and they are with modern grounded NEMA 5 receptacles. The higher-current versions are rare, with twist-locking plugs such as L6-30 or direct wiring more common. This series of four videos on proper handling and application of Nemasy® beneficial nematodes is expertly presented by Jen Browning, Technical Service Representative at BASF.

## What do NEMA Ratings Mean

These connectors are common on household backup generators, and on racks of power amplifiers in large audio systems. NEMA wiring devices are made in ratings from 15 to 60 A , with ratings from 125 to 600 V. This issue features articles on museum actions to improve their practices and

programs through a diversity and equity lens.

#### **NEMA enclosure types**

Typically, these connectors are found in commercial or industrial lighting circuits, especially where metal halide lamps are common. In 46 of the 50 United States and all of Canada, tamper-resistant receptacles are required in new residential construction as of November 2013.

#### **NEMA connector**

The 5-20R receptacle has a T-shaped neutral hole, to accept both 5-15P and 5-20P plugs. Meets drip and corrosion-resistance tests.
