Next they survey the various methods of dealing with atonal and serial music, focusing on Allen Forte's Basic Interval Pattern Analysis but also touching on the work of others. By considering such events essentially as collections of pitches or pitch classes even when the determination of such collections involves an intuitive response to other features, as part of the process of grouping that listening to music inevitably brings with it it has been possible to postpone the discussion of form as such. So, in music, as in all other human utterance, the aim is to make as clear as possible the relationships between the parts of the unity: in short, to show how one thing leads to another.
