Top 10 Strangest Animal Behaviors

The bodies of these lizards are flattened, and their sides thin towards the edge. For example, the , a South American bird, habitually perches on a tree, convincingly resembling a broken stump of a branch, while a butterfly, , looks just like a dead leaf.

Maybe not the strangest behavior for humans, but when you consider first that fish have orgasms, and second that they can fake them, this fish swims up the ranks of strange behavior to number 7. First, the predators approach their potential prey.

[public-docs.talentcoach.ir](#)

A few vertebrate species such as the are able to shoot squirts of blood from their eyes, by rapidly increasing the blood pressure within the eye sockets, if threatened. Anti-predator adaptation in action: the seal shark a—c and the wreckfish d—f attempt to prey on. These fish have a sharp scalpel-like spine on the front of each of their tail fins, able to inflict deep wounds.

Top 10 Strangest Animal Behaviors

The Female Brown Trout Ever fake an orgasm? Dung, in case the term escapes you, is excrement manure, feces... and the Dung Beetle loves it. The material is sticky and toxic to other insects.

Anti

Warning calls given by birds such as the are similarly , benefiting both predator and prey: the predator is informed that it has been detected and might as well save time and energy by giving up the chase, while the prey is protected from attack. .
