In fact, if I were to teach a basic seminar on postmodern gender studies and queer theory, The End of Gender would certainly make my reading list. A characteristic of psychoanalytic thinking is a tolerance for ambiguity, which made it a revolutionary and mind altering theory. The cause of the problem, she claims, comes from a slavish adherence to Freudian theory about gender, a kind of psychoanalytic chutzpah in failing to recognize that while psychoanalytic theory is the story of human functioning, it is only one story of human functioning.

Men sport ponytails and earrings and teach nursery school; women flaunt tattoos and biceps and smoke cigars. Thurer urges us to maintain an actively skeptical stance, allowing ourselves to remain uncertain and tolerant of ambiguity.

The eyes of the clinician, academic and general reader will be opened on how to deconstruct the concepts of gender, sexual orientation, and sexuality through psychoanalytic, postmodern, and queer theories.
