International Classification of Diseases

The Conquest of Smallpox: The Impact of Inoculation on Smallpox Mortality in Eighteenth Century Britain. Furthermore, the funding provided to the Intensified Smallpox Eradication Programme was insufficient to meet global needs, resulting mostly in vaccine shortages.

- **Medicare: home health agency numbers 1967**

It later became clear that the established ten year interval between revisions was too short.

- **Medicare: home health agency numbers 1967**

The downside of such an approach was that the virus could spread easily if it was re-introduced from overseas. Under the proposal, the ICD-9-CM code sets would be replaced with the ICD-10-CM code sets, effective 1 October 2013. National adaptations of the ICD-10 progressed to incorporate both clinical code ICD-10-CM and procedure code ICD-10-PCS with the revisions completed in 2003.

- **Medicare: home health agency numbers 1967**

In the US, a group of consultants was asked to study the 8th revision of ICD ICD-8a for its applicability to various users in the United States. Pandemics: A Very Short Introduction.

International Classification of Diseases

Therefore, the true cost of eradicating smallpox will never be known as individual country programs reach back to before records of public health expenditure existed.

International Classification of Diseases

This system is designed to promote international comparability in the collection, processing, classification, and presentation of these statistics.

International Classification of Diseases

The fact that the variola virus has remained distinct from the other members of its orthopoxvirus family for 3,000 years makes the former hypothesis more likely than the latter.

- **Medicare: home health agency numbers 1967**

When comparing these charts on London smallpox deaths and British life expectancy we see that neither smallpox deaths or life expectancy dramatically deviated from their averages following the wider adoption of variolation in 1722. Furthermore, while the available data did not show a clear decline in smallpox deaths after the introduction of inoculation in Britain, they do show dramatic declines in mortality in as well as in Sweden below from 1800 onwards.
