Nanotechnology in soil remediation – applications vs. implications

Much of the negative feedback against GMOs came from Europe, and the movement against nanotech in Europe may also evolve in a similar way. Many of the governmental regulatory frameworks we have today were conceived 30—40 years ago, when nanotechnology did not yet exist and therefore do not specifically address the unique properties of nanomaterials. About the Author: Nicholas Winstead is a graduate student in the

School of International Service at American University.
