Syntax Examples

The fact that the two types of sentence are distinguished in terms of clauses implies that we take the clause to be a more basic unit than the sentence, which reflects the fact that in speech it tends to be more difficult to determine the boundaries between sentences than the boundaries between clauses. This compares poorly with other languages such as and , where large, annotated corpora 45-100 million words are available, and where they have been used to study diachronic syntax in some detail see a of some of these studies, especially for the period 1994-2003. The arrangement of simple sentences to form complex sentences utilizes the skill of syntactical understanding.
