Project Accounting Concepts and Business Calculations

You must select Use Pay Codes for Unit Cost in the Project Setup window to use pay codes with timesheets. These features enable companies to see all cost, resources, schedule and finance transactions in one place.

Accounting for Cost of Services for a Service Business

See Specify default posting account numbers for records and classes for cost transactions on page 10 in the Project Accounting Accounting Control Guide for more information. See Profit types for calculating billing amounts on page 49 for more information.

Setting up and maintaining Project management and accounting

When you change the status of a contract from Estimate to Open, you will be asked whether to change the status of all projects in the contract to Open. Adjusting Entries At the end of the accounting period, the accountant must prepare the adjusting entries to update the accounts that are summarized in the financial statements.

Project accounting cost management

Over the past decade, many states and school districts have implemented site-based management initiatives. See Assign inventoried items to a cost category in a project budget on page 86 for more information.
