Statističke metode grupiranja u analizi podataka

. It looks for optimal structure of the given data and then forms clusters based on the information about the data.

Statistika

The goal is to find the optimal grouping criteria in which the observations within each cluster are similar, a different clusters differ from each other. Sažetak engleski Through this dissertation, we have shown how one can use cluster analysis methods in medicine. Cluster analysis includes the classification and identification of structures.

Statističke metode grupiranja u analizi podataka

In addition we explained the method by which we process the given data. We analyzed data on examinations in a certain hospital.

Statističke metode grupiranja u analizi podataka

Cilj je pronaći optimalan kriterij grupiranja kod kojeg su opažanja unutar svakog klastera slična, ali se različiti klasteri međusobno razlikuju. By applying cluster analysis, we identified different clusters which relate different types of examination with characteristics of patients, such as sex. We met the basic concepts of cluster analysis: definition, clustering methods and measures for forming clusters.

Statistika

Klaster analiza podrazumijeva klasifikaciju i prepoznavanje strukture. Vrsta resursa Tekst Način izrade datoteke Izvorno digitalna Prava pristupa Otvoreni pristup Uvjeti korištenja Datum i vrijeme pohrane 2019-02-18 11:55:22. Traži se optimalna struktura podataka za grupiranje opažanja u klastere koji se formiraju na temelju dostupnih informacija koje opisuju podatke i njihove veze.
